Technical Skills

Frontend Technologies: JavaScript (ES6), React, React Hooks, Redux, Enzyme, Chai, HTML5, CSS3, Bootstrap

Backend Technologies: NodeJs, ExpressJs, Core Java

Build & Development Tools: npm, Webpack, Git, SourceTree

DevOps & CI/CD: Docker, IBM Cloud Openshift, Jenkins

Project Management: JIRA, Agile/Scrum

MOHAMED RAFFICK

Fullstack Developer

Experienced Full-Stack Developer with 12+ years of expertise in building scalable, high-performance web applications using modern technologies such as ReactJS, Redux, Node.js, Express, and cloud platforms.

Professional Experience

Application Security — Hack The Box

- Ongoing hands-on training focused on strengthening secure full-stack development and understanding real-world web vulnerabilities.
- Completed modules covering web proxies, JavaScript deobfuscation, XSS, login brute forcing, broken authentication and additional security topics.

Portfolio Website Development

- Designed and developed a personal portfolio website to present professional experience, projects, and skills to German employers.
- Built the site using ReactJs, NodeJs, TypeScript, modern UI libraries, and responsive design principles, ensuring fast performance and cross-device compatibility.
- Integrated reusable components, routing, and clean architecture to demonstrate full-stack readiness.
- Deployed the application online using cloud-based hosting and modern CI/CD workflows.

Career Break – Relocation & Professional Development

- Relocated from India to Germany and managed family responsibilities while supporting successful settlement and integration.
- Pursued continuous professional development through self-study in modern web technologies, including JavaScript (ES6), React, Node.js, and related tools.
- Successfully obtained the TELC Deutsch B1 certification to build professional communication skills in Germany.

Application Developer | IBM India Pvt Ltd

- Built interactive dashboards and responsive UI pages for an insurance portal using **ReactJS, HTML5, CSS3, and Bootstrap**, developing reusable components that rendered dynamic JSON data from microservices.
- Built RESTful APIs using **Node.js and Express.js** to integrate frontend applications with backend microservices, enabling seamless data exchange and CRUD operations.
- Migrated and deployed applications from Docker to **IBM Cloud Openshift**; managed Helm deployments and Kubernetes orchestration across multiple environments.
- Strengthened security features and achieved 90% test coverage with React unit tests using Enzyme, Mocha and Chai.

Senior Software Engineer | Photon Interactive, India

- Developed and optimized the e-commerce page for Walgreens, improving loading speed by 80%.
- Built a product display page interacting with multiple hosts using Portlet Factory.
- Implemented a web page to handle large file data with BLOB and CLOB.
- Developed various reusable web components and unit test cases.
- Collaborated with international clients including Walgreens, State Street Banking Corporation and Johnson & Johnson.
